

76. A system for recycling in accordance with claim 48, wherein said washer is adapted to provide uptake and throughput capacity for a treatment time of more than about 20 minutes.

77. A system for recycling in accordance with claim 76, wherein said treatment time
ENo A, is about 30 minutes.

REMARKS

The specification, as an English translation of a foreign language application, has been corrected and completely re-typed to include proper idiomatic English. Two invention summarization paragraphs have been included in the "Summary of the Invention" portion. Words have been corrected to provide consistent usage (e.g., "sink-float separator"), and section headings have been added. However, no new matter has been added to the corrected and re-typed specification.

The original claims 1-28 have been cancelled without prejudice, and new claims 29-77 substituted therefor so as to eliminate characterizing language, and to present the claims in proper U.S. method and apparatus claim style. However, the claims have not been narrowed.

A substitute Abstract has been provided on a separate sheet. Attached hereto is a marked-up version of the changes made to the abstract. The attached page is captioned "Version with markings to show changes made".

It is respectfully submitted the application as amended above is now in condition for substantive examination on the merits. If any claim or other fees are due by this Amendment, please charge our deposit account No. 13-2855.

Respectfully submitted,

Klaus Klenk, Applicant

Date: November 15, 2001
